

LNC  
VOICENT

# LNC SOFTWARE SOLUTION

**Revolutionize Your  
Warehouse Operations  
With Hands-free,  
Voice-guided Workflows**

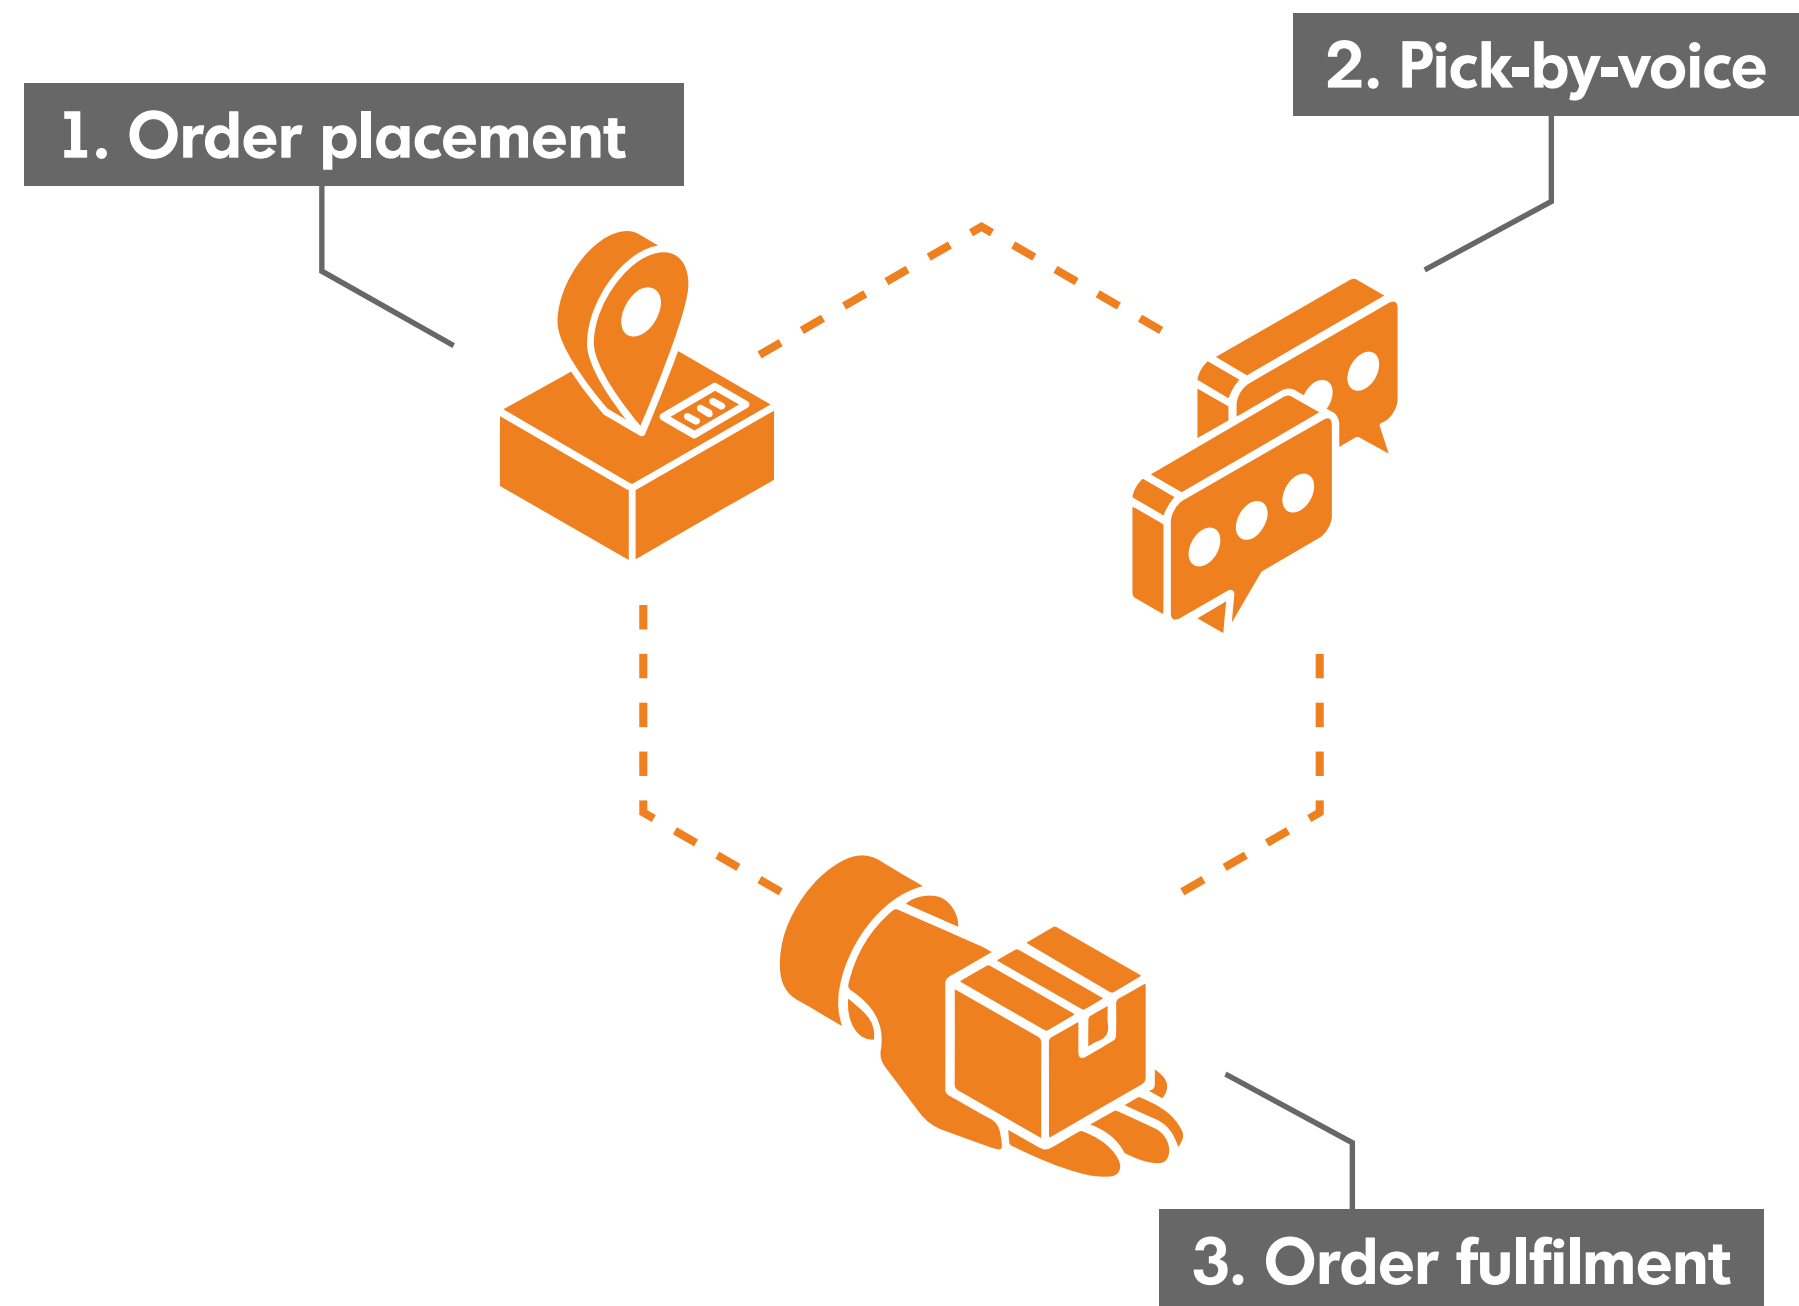

# LNC VOICENT Software Solution

**LNC VOICENT** is a software interface designed to seamlessly integrate your company's Warehouse Management System (WMS) or Enterprise Resource Planning (ERP) software, such as SAP, with various pick-by-voice solutions.

Our mission is to empower your business by amplifying efficiency and precision in your warehouse operations through voice-directed warehousing-supported workflows. Experience unrivalled performance and innovation with LNC VOICENT, the future of digital warehouse management.

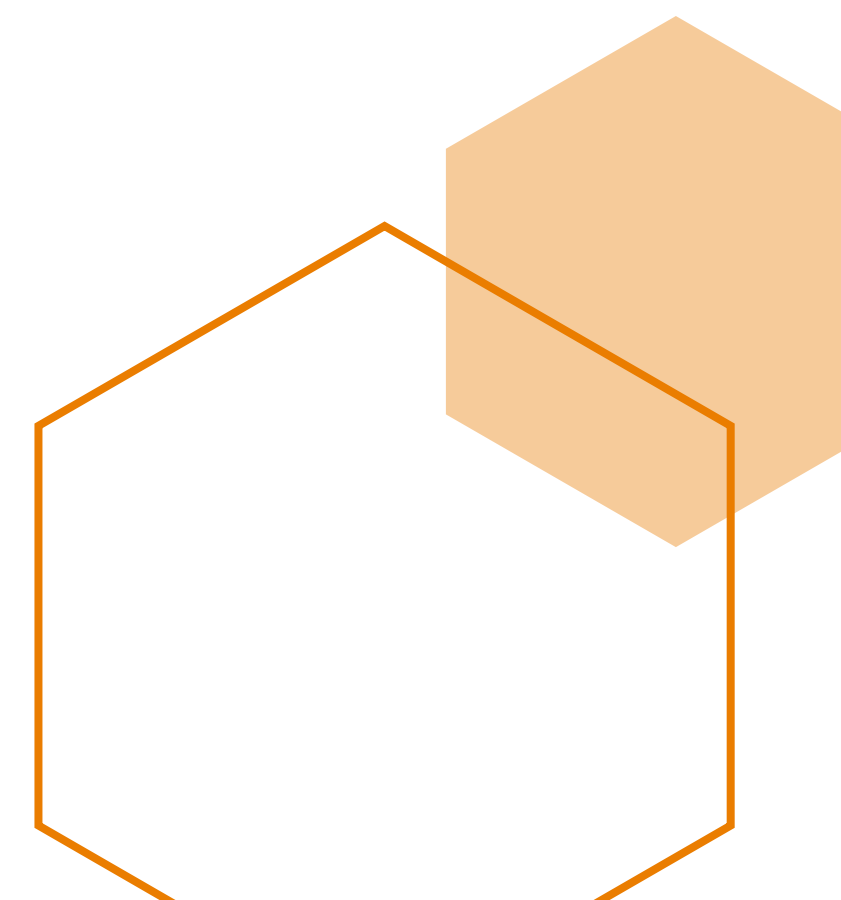

## Accurate & efficient

**LNC VOICENT** is the best solution for your business to streamline operations, enhance accuracy and boost overall productivity.

Stay ahead in the digital age with our advanced error-checking mechanisms and scalable architecture, so you can streamline warehouse operations while cutting operational costs. Discover the advantages of LNC VOICENT today and revolutionize the way you manage your warehouse operations, setting the stage for next-level warehouse management technology.

# LNC VOICENT Features

- 
- A single, **easy-to-integrate platform with a unified interface** to manage and streamline the data exchange between your WMS or ERP system and various voice picking solutions
  - Designed to be compatible with a wide range of WMS and ERP systems, ensuring a **hassle-free integration process** for your business
  - **Accurate and real-time data transfer** between your WMS or ERP and voice solutions, reducing errors and improving overall operational performance
  - **Built-in validation algorithms detect and flag discrepancies** in data before transmission
  - As your business grows, LNC VOICENT can **easily scale increased demands**, adapting to your ever-changing warehouse management needs
  - **Out-of-the-box reports** (intuitive dashboard, accuracy and performance tracking etc.).

# LNC VOICENT Benefits

- **Empower your workforce with hands-free, voice-guided workflows**, allowing them to complete tasks more efficiently and accurately
- **Minimize manual data entry errors and improve order accuracy**, which leads to higher customer satisfaction
- **Stay ahead of the competition by embracing innovative, voice-supported warehouse management technology**
- **Optimize your warehouse processes and workflows, increase overall efficiency and reduce operational costs**
- **Quickly connect new data sources with minimal configuration, ensuring uninterrupted warehouse operations**

Improve  
accuracy

Increase  
productivity

Reduce  
costs
