GATEWIZ

LNC GATEWIZ
Software Solution

LNC GATEWIZ Software Solution helps you effortlessly map, plan and manage gate utilization, schedule cargo, streamline communication and manage your warehouse workload with ease.

With our user-friendly interface, you and your team can access shipment details, loading sequences and other relevant information to prepare for loading or unloading – without any stress.

1. Plan & Schedule
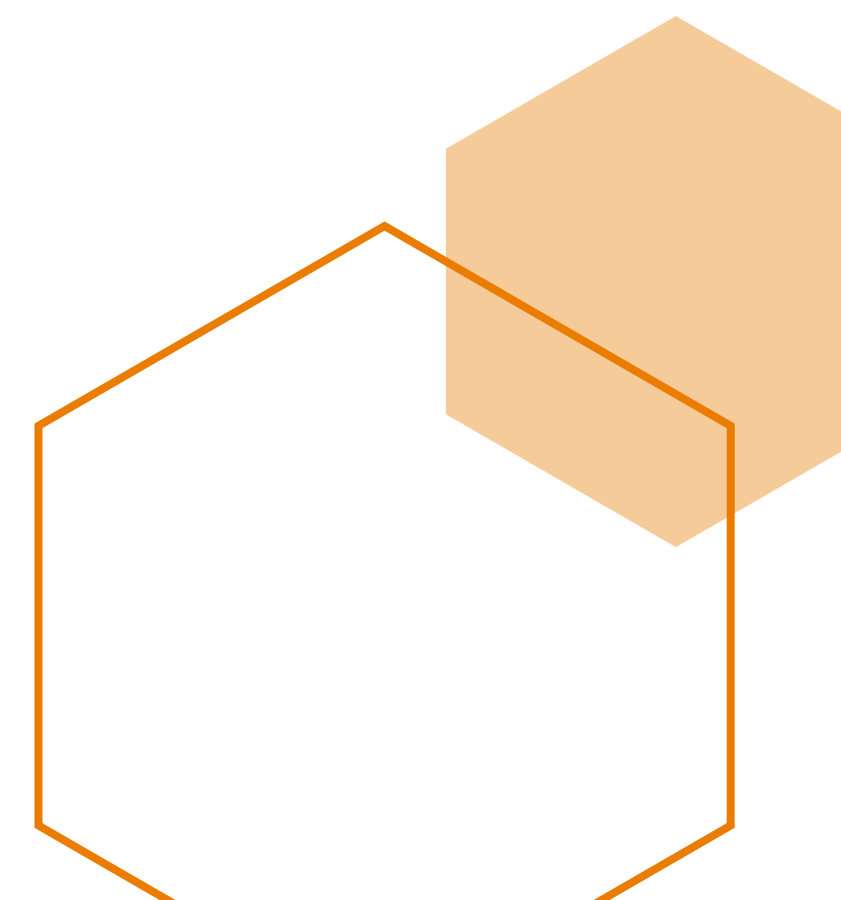

2. Manage appointments

3. Manage unloading

Easy-to-use and intuitive

Experience hassle-free warehouse management with **LNC GATEWIZ**, the easy-to-use and intuitive software tool that seamlessly interfaces with your ERP to manage dock availability, assign fixed or flexible time slots for delivery and provide smart notifications.

Easily eliminate queues, automate truck arrivals and streamline communication.

Say goodbye to congestion at the warehouse gates, unexpected bursts in workload, charges for waiting hours and theft of high-value truck loads.

LNC GATEWIZ Features

- **Interactive calendar display** for easy truck scheduling andmanagement

- **Forward-looking overview of availability** to help plan and allocate resources effectively

- **Monitor activities** at the loading ramps to ensure streamlined operations

- **Drag & drop functionality for adjusting time slots** quickly and easily

- **Process time recordings** to track and optimize warehouse operations

- **Management of appointments** for efficient scheduling

- **Comprehensive target/actual reporting** to provide valuable insights and data analysis

- **Event-based alert and reporting system** to stay on top of any issues or delays

- **Generate detailed utilization reports per gate, ramp, or site** to optimize the utilization of space and resources

- **Different system languages** to accommodate diverse user needs and preferences
